-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 3/16/05, 6/22/05.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/17/05 has been entered.

The subsequent submission of 6/22/05 to remedy a notice of non-compliant amendment has been entered and considered.

The IDS of 3/17/05 has been entered and considered.

The examiner has closely considered the available record.

Claims 1-33, 36 and 38 are pending. Claims 38 is newly filed.

The declaration under 1.132 of Dr. Agrafiotis is sufficient to overcome the rejection under 35 USC 102(a). It is noted that the declaration has a typographical error. The reference was clearly published 8/12/2000 as indicated by its "published on the web" date. However, the remainder of the declaration meets the requirements.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 14-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The system of claim 14 does not comprise any system parts (input, database, controller, output), nor is the "system" identified as software. Even if it were identified as software, the computer software is not embodied in a computer readable media. Therefore, the claim is drawn to "data in space" which is nonstatutory. None of the dependent

Art Unit: 1631

claims recite any physical system components. Amending the claim(s) to recite computer system hardware or that the system resides in computer readable media may obviate this rejection.

MPEP 2106: "computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs, are not physical "things." They are neither computer components nor statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized. In contrast, a claimed computer- readable medium encoded with a computer program is a computer element which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer program's functionality to be realized, and is thus statutory. Accordingly, it is important to distinguish claims that define descriptive material per se from claims that define statutory inventions... Since a computer program is merely a set of instructions capable of being executed by a computer, the computer program itself is not a process and Office personnel should treat a claim for a computer program, without the computer-readable medium needed to realize the computer program's functionality, as nonstatutory functional descriptive material.

Conclusion

Claims 1-13 and 24-33, 35 and 38 are allowed.
